SUBJECT: Oral Presentation of Your DDF Proposal

I regret to report that your proposal to the 2004 GSFC Director's Discretionary Fund, "Vicarious Calibration of Hyperspectral Sensors" was not selected for oral review by our panel of experts.

The review panel looked closely at the degree of innovation, quality, and relevance to the GSFC mission of each proposal. Only those proposals which ranked highly on all of these points, which were judged to be of a truly "leading-edge" nature, were selected for oral review. I encourage you to continue developing your ideas to make them more suitable for DDF funding, and/or explore other possible sources of funding.

Please feel free to call me at X6-9690 if you have any questions.
